SERVICES

How TNH supports your organization

Support for what you run today, what you need to protect, and what comes next.

01 Keep operations running

Day to day

Managed IT

Proactive monitoring and maintenance, so issues are caught early.

Help Desk and Support

Tier 1 and Tier 2 support, remote or on-site, including onboarding and account provisioning.

Network Management

Design, deployment, and ongoing maintenance of your network.

02 Protect your environment

Risk and continuity

Cybersecurity

Security patching, updates, and ongoing system maintenance.

Backup and Disaster Recovery

Backup configuration, monitoring, and recovery planning.

03 Support what comes next

Projects & change

Microsoft 365 Management

Setup, licensing, and day-to-day administration.

Cloud Migration

Planned, low-disruption moves to the right cloud platform.

Infrastructure Projects

Office moves and hardware refreshes, planned end to end.

Need something that is not listed? Our capabilities extend beyond the services shown here. Tell us about your environment and what you are trying to accomplish.

HOW WE WORK

How an engagement starts

01

Understand the organization

We begin by understanding your operations, technology environment, and priorities.

02

Map the environment

A clear-eyed look at what you have, what's fragile, and what's overdue.

03

Build the right-sized plan

Recommendations aligned with your needs, priorities, and environment.

OUR APPROACH

Thoughtful IT support, built around your environment

Think beyond the immediate issue

We consider how a change may affect the rest of your environment before recommending a path forward.

Plan with reliability and safety in mind

Technology decisions are approached with risks, dependencies, and business continuity in mind.

Put your environment first

Recommendations are based on what makes sense for your systems and your needs.

Aim to solve problems thoroughly

The goal is to address the underlying cause, not only the symptom in front of us.

SCOPE

Technology support built around your environment, not your industry

TNH supports organizations across industries and operating environments. The services listed here are representative capabilities rather than a fixed catalog, and support can evolve with your needs, from a specific project or issue to ongoing technology support.

Service area: Houston and surrounding areas. For support outside the Houston area, contact us to discuss your needs.
